Job Title: AI Engineer

Location: Hybrid (London, UK)

Department: Artificial Intelligence & Data Science

Employment Type: Full-Time

About the Role:

We are looking for a passionate and skilled **AI Engineer** to join our cutting-edge innovation team. You'll work on designing, developing, and deploying machine learning models that power our AI-driven products. This role offers the opportunity to solve realworld challenges using the latest advancements in deep learning, NLP, and computer vision.

Responsibilities:

- Design, train, and fine-tune machine learning and deep learning models.
- Implement AI pipelines and deploy models to production environments.
- Collaborate with data scientists, product teams, and software engineers to deliver scalable AI solutions.
- Conduct research to stay updated on AI/ML trends and incorporate innovative methods.
- Ensure responsible AI use and monitor model performance over time.

Requirements:

- Bachelor's or Master's in Computer Science, AI, Data Science, or a related field.
- Strong experience in Python, TensorFlow/PyTorch, and cloud platforms (AWS/GCP/Azure).
- Experience with data preprocessing, model training, and MLOps tools.
- Familiarity with NLP, recommendation systems, or generative AI is a plus.
- Solid problem-solving skills and ability to work independently or in teams.

Nice to Have:

- Publications or open-source contributions in AI/ML.
- Experience with deploying LLMs or working on RAG systems.
